Customizing the Load Forecasting Problem
Short Term Load Forcasting
Deep Learning Based Models
Concept&Innovation
Scoping and Pooling
Analyzing, Classification, Reforming.
Main Ideas
Datasets
Techniques
Fine-Tuning
Target Set (DL-STLF)
Evaluation&Sorting
Main Pool
Filtering, Abstracting, Future Directions
Trendy Methods (RNN, LSTM, GRU, CNN, Autoencoders)
Future Directions:
• Online-type
• Uncertainty-aware
• Feasibility
Key Findings for Future Directions
Discussions on Suggestions and Limitations
